

Sutton Park Primary School

Curriculum Map Year 5 Autumn Term

This term we will consider the question...

What was society like in Ancient Greece?

In Year 5, the children began to look at life in Ancient Greece. We will now be diving deeper into what society was like and how their way of life has influenced ours. Alongside this, we will be exploring their diet and using our food technology skills to create a balanced meal for an Ancient Greek citizen.

PE will be on Tuesday and Friday.
We will be doing football and gymnastics.

KASE

Our curriculum is designed to ensure the children build their knowledge whilst having opportunities to develop important attributes like teamwork and empathy. We plan for a clear progression of skills and provide a wealth of experiences to further their engagement and understanding. We therefore call this our KASE curriculum.

RE

In RE, we will be thinking about Jesus as the Messiah and Christian beliefs surrounding this.

English

In English, we will be using our key text 'Who let the Gods out' by Maz Evans to help support our writing. We will begin by writing in an informative style to produce a non-chronological report and focussing on the skills needed to do so successfully. We will then move onto writing instructions. Through history and DT, we will be creating some traditional Greek dishes. Therefore, we will be writing the instructions needed to go alongside this.

We will continue to develop our VIPERS skills using Mark of the Cyclops – we will have a focus on providing evidence from a text to support answers, as well as using key information when summarising.

Maths

In maths, we will begin by re-visiting our prior knowledge of multiplication and division. Using this, we will be focussing on factors and multiples, before moving onto long multiplication and division. We will then be looking at comparing and ordering fractions.

Following on from this, we will be looking at different forms of measure, including weight and time. We will re-visit our knowledge of formal addition and subtraction whilst doing this.

We will also have a weekly arithmetic session every Friday morning, allowing children the opportunity to regularly revisit the skills needed for this.

History

In history, we will be exploring who the Ancient Greeks were. We will look at day to day life, how the city states were set up, their hobbies and their beliefs as well as them being the founders of democracy. We will also be studying Alexander the Great and why he was so renowned. We will be using sources and artefacts to support this.

PSHE and Thrive

In PSHE, we will be looking at the influence that the media has on society. We will be addressing the pros and cons of social media, and how not everything we see is real. In THRIVE, we will be working in teams to create a board game.

PE

In PE we will be looking at football skills - as well as building on previous year's work on balance and posture in gymnastics.

DT

In DT we will be looking at healthy diets and diets in other cultures. We will be making garlic flat bread and Mezze Bowls.

Art and Music

In art, we will be looking at armatures and using clay to produce a Greek inspired pot. We will be investigating and practicing all the skills needed to do this. In music, we will be looking at composition and learning musical notation. We will also be listening to Greek music and transferring our skills of notation across.

Geography

We will be continuing our work on the environmental regions of the world, with a focus on how this impacts life in Greece.

Computing

In computing, we will be focusing on producing, creating and editing videos, using software on iPads.
